Connect Sage ERP Systems to Concur® Expense and Concur® Invoice

sage 100cloud

sage 500 ERP

sage X3

SAP® Concur® Partner
App Center

Accelerate your business and eliminate data silos

by connecting your Sage ERP system to SAP Concur with DataMap Connector.

Automate processes, reduce data entry and increase accuracy with the bi-directional integration DataMap Connector for Sage 100cloud, Sage 500 and Sage X3.

Why DataMap?
• Save time by reducing duplicate data entry
• Eliminate data entry errors
• Ensure accuracy of data in both systems
• Increase control with business-based rules
• Improve security with record-based roles

What makes DataMap different?
• Web-based integration
• Ability to push and pull data without needing to extract files
• Bi-directional connection
• Secure and scalable
• Developed by Sage Software experts that use system logic to process data
• Ability to easily audit the data in both systems

DataMap Connector for Sage connects Concur Invoice and Concur Expense with the following Sage Software solutions:
• **Sage 100cloud**
• **Sage 500**
• **Sage X3**

Don't let disconnected systems slow you down. Get DataMap Connector for Sage and integrate your SAP Concur and Sage Software solutions to save time and increase accuracy, so you can get back to tasks that are more valuable for the business.
